

MIDDLE SCHOOL READING CLASSROOM COACHING

Partner for Student Success

6th Grade Classroom Coaches share a love of reading with students, increasing fluency and comprehension for increased learning outcomes. Reading is key to success in all other subjects. A student who struggles with reading in 6th grade is likely to have difficulties in Science, History, Math and other subjects.

As a Reading Classroom Coach you will:

- **Provide consistent, positive interaction** with 2-3 students
- **Show students you care** about their academic success
- **Motivate students** by bringing your enthusiasm for reading
- **Build a strong foundation** for future success across all subjects
- **Model cooperative behavior** as you strengthen student skills
- **Support teachers** by providing individualized instruction
- **Experience the reward** of knowing you helped another person
- **Work in class 45 minutes** a week with the teacher present
- **Utilize training materials** and on-going support to ensure success

"I liked having the APIE tutors come to my class. I'm excited - because of them I got to learn something new.

Everybody deserves the chance to learn something new. Because of them we're probably going to be the best readers in the world."

- Mark, 6th grade student in Reading Classroom Coaching

I come out of these coaching sessions so energized. It's actually hard to sum up in words -- there's nothing to compare it with. It's such a joy. I know I'm making a difference. I'm having a positive impact." - Alejandro Dominguez, 6th grade Reading Classroom Coach
