

STEP-UP MATH AND READING COACHING

Partner for Student Success

Step-Up accelerates the academic achievement of struggling students by providing the extra instructional support they need to succeed. This includes:

- High frequency tutoring in math or reading (3-5 times a week)
- Individualized, focused small group learning
- Differentiated curriculum to meet specific needs
- Frequent monitoring to measure progress toward goals

As a Step-Up Volunteer, you will....

- **Provide consistent, positive support** as a mentor/tutor for 1 - 3 middle school students, one or more days a week
- **Apply interactive learning tools** to engage students in building critical skills
- **Support teachers** by providing differentiated, individualized lessons
- **Model cooperative behavior** to strengthen individual and group skills
- **Motivate students** by sharing your enjoyment of reading or math and making the concepts studied more relevant
- **Show students** you care about them and their academic success
- **Celebrate** student successes
- **Build a strong foundation** for future success, reducing drop-out risk
- **Encourage children** to ask questions and think for themselves
- **Experience the reward** of knowing you helped another person

Step-Up Reading and Math students meet with tutors 3 - 4 sessions a week at various times Mondays - Thursdays. Our program coordinator can assist you with choosing the day or days that work best for you.
